RESEARCH INTERESTS

finite model theory
dynamic logics
PDL & μ-calculus
decidable fragments of FO
description logics
automata & games
computational complexity

finite models → foldable cacti

Bartosz Jan **Bednarczyk**

Senior Postdoc & PI of the FWF ESPRIT project FINGO – TU Wien
Assistant Professor – University of Wrocław

I am a logician working in *applied dendrology*: most of my current research uses trees, cacti and flowers for finite-model reasoning in dynamic logics (extensions of PDL, the modal μ-calculus, and more). More broadly, I study the decidability and complexity of fragments of first-order logic (guarded, fluted/ordered, forward and two-variable), description logics and temporal logics, as well as finite model theory and the theory of computation.

HIGHLIGHTS

- PI of the **FWF ESPRIT** project **FINGO** at TU Wien (346 505 EUR)
- **PhD with distinction**, TU Dresden (2024)
- **Two Best Student Paper Awards** (JELIA 2021, JELIA 2023)
- **Award for Outstanding Young Scientists**, Polish Ministry (2021)
- Papers at **LICS, ICALP, IJCAI, AAAI, KR**; articles in **LMCS, JAIR, ToCL**
- **17 supervised theses**; supervising a PhD student since 2026
- **Five-day course at ESSLLI 2026**, co-taught with Ian Pratt-Hartmann

EMPLOYMENT

04.2026 to 03.2029 — **Senior Postdoc & PI of FWF project FINGO** — TU Wien
Institute of Logic and Computation; mentor: Magdalena Ortiz.

03.2025 to 03.2026 — **Postdoctoral Researcher (part-time)** — TU Wien
FWF project *ONTEGRA* (PI: Magdalena Ortiz).

10.2024 to present — **Assistant Professor** — University of Wrocław
Institute of Computer Science; currently on a 20% workload.

04.2019 to 09.2024 — **Research Associate** — TU Dresden
Computational Logic Group; ERC CoG *DeciGUT* (PI: Sebastian Rudolph).

03.2017 to 06.2018 — **Student Researcher** — University of Wrocław
NCN grant *A quest for new computer logics* (PI: Emanuel Kieroński).

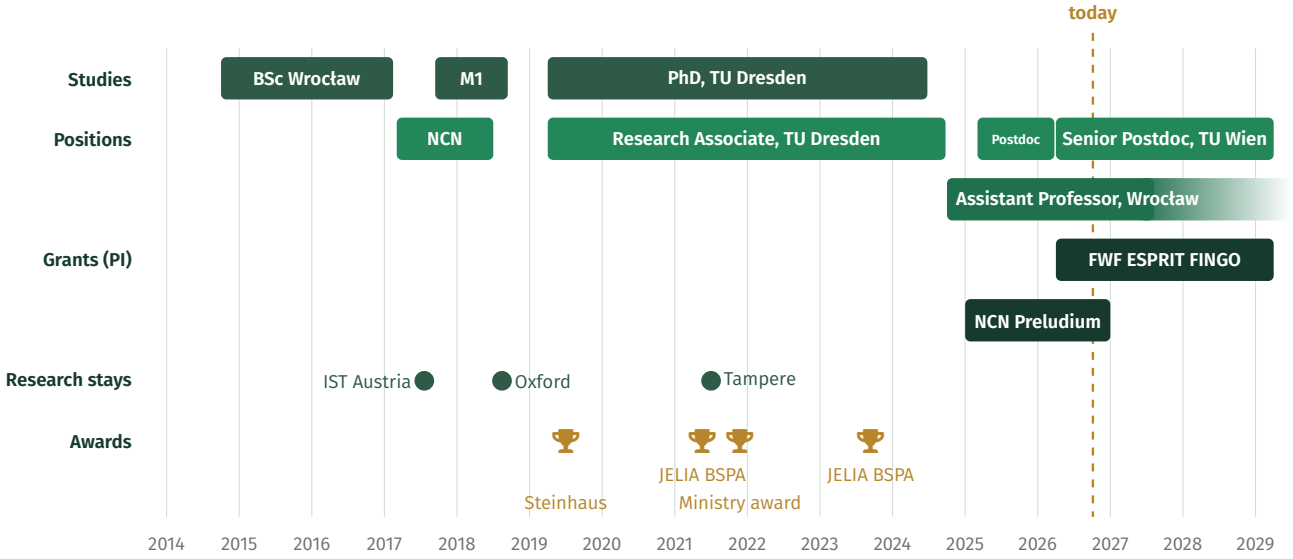

EDUCATION

2019 to 06.2024 — **PhD (Dr. rer. nat.), *with distinction*** — TU Dresden
Database-Inspired Reasoning Problems in Description Logics With Path Expressions
Supervisors: S. Rudolph, E. Kieroński • reviewers: S. Rudolph, M. Ortiz

2017 to 2018 — **M1 in Computer Science (MPRI)** — ENS Paris-Saclay
Assertion Languages with Modalities and Separating Connectives
Supervisor: S. Demri • **magna cum laude** • published at LICS 2019

2014 to 2017 — **BSc in Computer Science** — University of Wrocław
Satisfiability of the Two-Variable Fragment of First-Order Logic with Counting Quantifiers over Finite Trees
Supervisor: W. Charatonik • published at CSL 2017

CAREER AT A GLANCE

RESEARCH FUNDING

AS PRINCIPAL INVESTIGATOR

04.2026 to 03.2029

FINGO: Finite Graph Operating Automata Meet Dynamic Logics — 346 505 EUR, 36 months
FWF ESPRIT grant, Austrian Science Fund
Hosted by TU Wien • DOI 10.55776/ESP2407425
Finite-model reasoning for extensions of PDL and the μ-calculus.

01.2025 to 12.2026

Decision Problems for Logics with Weak Forms of Recursion — 63 600 PLN, 12 months, extended to 24
NCN Preludium grant, National Science Centre, Poland
Hosted by the University of Wrocław • 2024/53/N/ST6/01390
Ranked **first** among all computer-science proposals.
No-cost one-year extension; runs until December 2026.

AS RESEARCHER

03.2025 to 03.2026 — **FWF project ONTEGRA** — TU Wien
Ontology-based access to Temporal and Graph Data
PI: Magdalena Ortiz • 10.55776/PIN8884924

04.2019 to 09.2024 — **ERC Consolidator Grant DeciGUT** — TU Dresden
A Grand Unified Theory of Decidability in Logic-Based Knowledge Representation
PI: Sebastian Rudolph • grant agreement 771779

03.2017 to 06.2018 — **NCN Opus grant** — University of Wrocław
A quest for new computer logics
PI: Emanuel Kieroński • 2016/21/B/ST6/01444

AWARDS & HONOURS

2025 — **Nomination for the GI Dissertationspreis** — Gesellschaft für Informatik
Annual award of the German Informatics Society for the best PhD thesis in computer science.
Nomination declined.

2023 — **Best Student Paper Award, JELIA 2023** — 500 EUR • unrestricted use
For *Beyond ALCreg: Exploring Non-Regular Extensions of PDL with Description Logics Features.*

2021 — **Award for Outstanding Young Scientists** — 194 040 PLN • unrestricted use
Polish Ministry of Science and Higher Education.

2021 **Best Student Paper Award, JELIA 2021** 500 EUR • unrestricted use
For *Exploiting Forwardness: Satisfiability and Query-Entailment in Forward Guarded Fragment.*

2019 **Hugo Steinhaus Scholarship for Mathematical Sciences** 18 000 PLN • unrestricted use
Awarded to outstanding PhD students in Wrocław.

LONGER RESEARCH STAYS

2021 **Tampere University, Finland** 2 months
Model theory of ordered logics. Host: Antti Kuusisto.

2018 **TU Dresden, Germany** weekly visits over ≈ 6 months
Query entailment in description logics. Host: Sebastian Rudolph.

2018 **University of Oxford, United Kingdom** 3-month internship
Tree algebras and their connections to circuit complexity. Hosts: James Worrell and Michaël Cadilhac.

2017 **IST Austria, Klosterneuburg** 3-month internship
Temporal logics for quantitative properties and weighted automata. Host: Krishnendu Chatterjee.

INDUSTRY EXPERIENCE

during studies **Software Engineering Intern** Bloomberg, London
Monitoring Cassandra databases (3 months).

during studies **Software Engineering Intern** Neurosoft, Wrocław
Developing web applications with Groovy and MongoDB (3 months).

STUDENT SUPERVISION

I supervise ambitious students, teach them how to do research, and often write joint papers with them. Their theses led to publications at **FSTTCS 2021**, **WoLLIC 2022**, **DL 2022** and **DL 2026**.

† Officially registered under another supervisor, as I had no PhD yet; I supervised these theses in full.

TEACHING

2026 — **Computational Perspectives on the Classical Decision Problem** — ESSLLI 2026
Five-day course co-taught with Ian Pratt-Hartmann.

2025/26 — **TU Wien** — Faculty of Informatics
Decidable Logics for Knowledge and Data: lecture, co-taught with Magdalena Ortiz (winter 2025/26).

2018 to present — **University of Wrocław** — Institute of Computer Science • student evaluations

- **Lectures:** Logic 2: Introduction to Classical and Finite Model Theory (2025, 2026/27); Introduction to Finite and Classical Model Theory (2022/23); Finite Models, with P. Ostropolski-Nalewaja (2020/21)
- **Supplementary lecture:** Logic for Computer Scientists (2020/21, 2021/22, 2024/25, 2026/27)
- **Seminars:** Finite and Algorithmic Model Theory (2020/21); Logic and Databases (2018/19, 2019/20)
- **Exercises:** Logic for Computer Scientists (2018–2025); Discrete Mathematics (2024/25); Databases

2021 to 2022 — **TU Dresden** — Computational Logic Group
Finite and Algorithmic Model Theory: lecture and exercise classes (2021, 2022).

2021 to 2025 — **XIV High School of Wrocław** — Computer Science teacher
Classes preparing students for the extended Matura exam in computer science.

2018–2022 and 2014–2016 — **Private tutoring** — Own tutoring business
Private lessons in maths, logic and computer science; rated 5.0/5 in 48 reviews on e-korepetycje.net.

2014 to 2017 — **Teaching during studies** — University of Wrocław
Assistant to a student with disabilities (C, logic); many extra classes in *Logic for Computer Scientists*.

PROFESSIONAL SERVICE

Committees — **Elected member of the Description Logics Steering Committee** — 2025–2028
Member of the FLoC 2026 workshop committee.

Organisation — **Co-organiser of the Description Logics Seminar** — 2024/25–2026/27
Co-organiser of DL 2025 (Opole) and the VLDB Summer Schools 2025 and 2026.

Senior roles — **Area Chair, ECAI 2027** • **Senior PC member, IJCAI 2021**

PC member — **Programme committees**
